

# 'How to Setup Email access for ' Mac OS

## Step 1

Open the mail program, and after selecting the mail menu at the top right hand corner of your screen, choose *Preferences*.

## Step 2

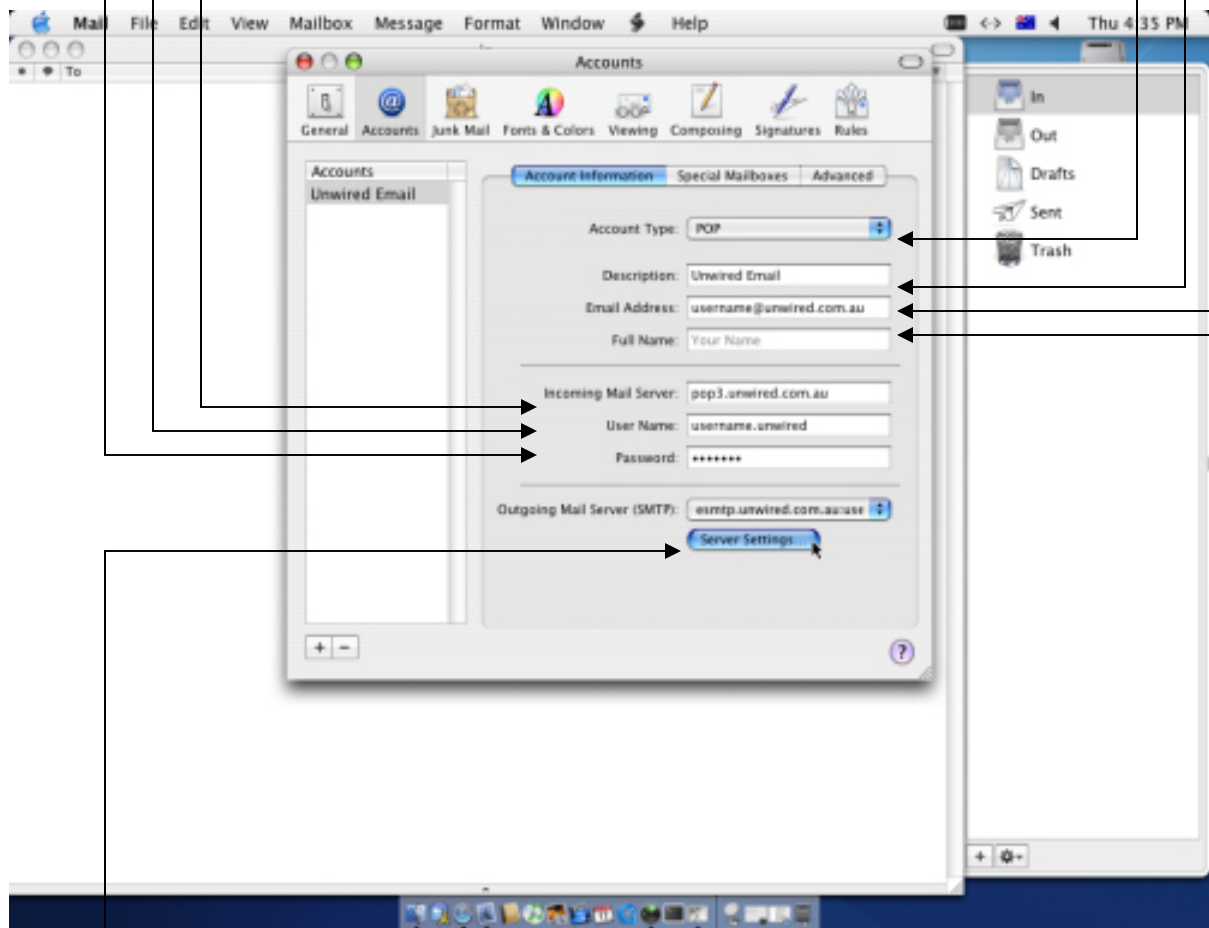

Inside the preferences screen, at the bottom right hand corner, click the '+' symbol to add a new account.

### Step 3

Enter in the following details, replacing *username* with your own username :

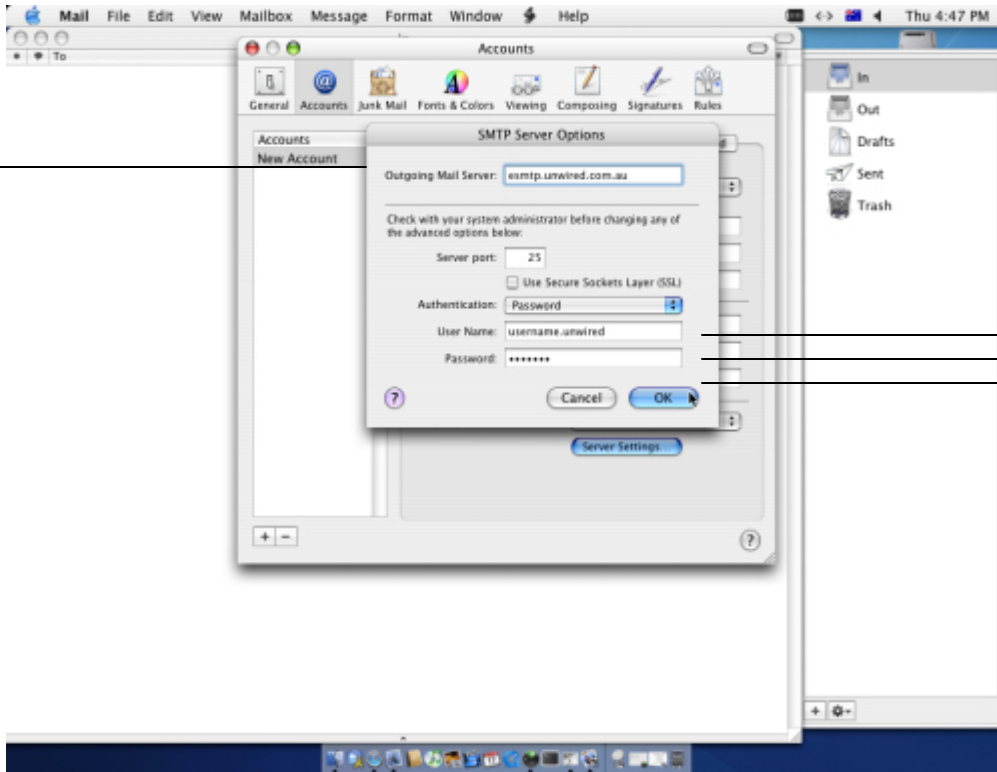

**Account type:** POP  
**Description:** Unwired Email  
**Email address:** *username*@unwired.com.fj  
**Full name :** Your name as you wish email recipients to see it  
**Incoming mail server:** pop.unwired.com.fj  
**Username:** *username*@unwired.com.fj  
**Password:** your unwired password

### Step 4

Click the 'server settings' button at the bottom of the accounts screen.

## Step 5

Next to 'Outgoing mail server', enter *smtp.unwired.com.fj*. Next to 'Authentication', choose 'password', and enter in the lower two options:

**Username:** *username@unwired.com.fj*

**Password:** Your unwired password

Click ok to close the server settings window.

## Step 6

Click ok to close the accounts window, and your email is now setup!
